PROJECTS

Tiffin Delivery Management System

MCA Mini-Project at College (June 2023)

- Tiffin Delivery Management System is a web-based application that allows the administrator to handle all the activities online quickly and safely. Using Interactive GUI, anyone can quickly learn to use the complete system. This system will give power and flexibility to the administrator to manage the entire system from a single online portal. In this Tiffin Delivery Management System, we used PHP and MySQL database. This project keeps the record of Tiffin's orders. This project has two modules i.e. admin and user.

Technologies Used: Frontend - HTML, CSS, JS, Bootstrap

Backend - PHP 7.4

Database - MySQL

FastFruits Delivery (Instant Fruit Delivery Platform)

ProWiggle Data Solutions Pvt Ltd (February 2024)

- FastFruits Delivery is a web application designed to provide customers with a convenient and efficient way to purchase fresh fruits for immediate delivery. This project aims to bridge the gap between traditional fruit vendors and the growing demand for online grocery shopping with a focus on speed and freshness.

Technologies Used: Frontend - React, Axios, CSS

Backend - Laravel 10

Database - MySQL
