- **Tools:** Git, GitHub, VSCode.
- **Languages:** English, Hindi, Marathi

PROJECTS

Tiffin Management System   **(MCA Mini-Project at College)**

- Tiffin Delivery Management System is a web-based application that allows the administrator to handle all the activities online quickly and safely. Using Interactive GUI, anyone can quickly learn to use the complete system. This system will give power and flexibility to the administrator to manage the entire system from a single online portal. In this Tiffin Delivery Management System, we used PHP and MySQL database. This project keeps the record of Tiffin's orders. This project has two modules i.e. admin and user.

Technologies Used: **Frontend** - HTML, CSS, JS, Bootstrap
                         Backend - PHP 7.4
                         Database - MySQL

FastFruits Delivery (Instant Fruits Delivery Platform)

ProWiggle Data Solutions Pvt Ltd.

- FastFruits Delivery is a web application designed to provide customers with a convenient and efficient way to purchase fresh fruits for immediate delivery. This project aims to bridge the gap between traditional fruit vendors and the growing demand for online grocery shopping with a focus on speed and freshness.

Technologies Used: **Frontend** - HTML, CSS, JS, Bootstrap
Backend - Laravel 10
Database - MySQL

NextGen UX

- Crafted a sleek, responsive website for NextGen UX, an academy offering UI/UX design training. Designed intuitive, user-centered pages using Tailwind CSS, focusing on clean visuals and seamless navigation. Ensured a consistent and engaging experience across devices, blending modern design with functional usability.

Technologies Used: Tailwind CSS

PHP CRUD Application

- Developed a PHP-based web application to perform Create, Read, Update, and Delete (CRUD) operations on a database. Implemented secure data handling and efficient database management using MySQL. Focused on user-friendly interface design and optimized backend performance.

Laravel CRUD Application

- Built a web application using Laravel framework to manage Create, Read, Update, and Delete (CRUD) operations. Integrated MySQL for database management and implemented features such as routing, form validation, and data security. Focused on clean architecture, modular code, and efficient database interactions.
